

## **ENERGY AND WATER EFFICIENCY POLICY**

Our hotel considers the efficient, effective, and sustainable use of energy and water resources as a fundamental responsibility while carrying out its operations. In this regard, we commit to:

Regularly monitoring, measuring, and analyzing energy and water consumption,

Setting objectives to improve energy and water efficiency and ensuring continual improvement,

Complying with all applicable national legal requirements and other obligations related to energy and water use,

Implementing practices to prevent energy and water losses and to reduce leakage and waste,

Using technologies that enhance energy efficiency as well as equipment and systems that support water conservation,

Increasing awareness among our employees and guests regarding energy and water efficiency,

We are committed to supporting renewable energy sources and alternative water management practices as much as possible in order to reduce environmental impacts.
